pmjpraveen.framer.ai

Product designer with 8+ years building 0-to-1 and enterprise-scale products across marketplace, big-tech, and industrial platforms. I partner with engineering and product teams to turn ambiguous, data-dense problems into scalable, AI-powered design systems. Co-founded and previously led design of top platforms, combining founder-level ownership with hands-on craft to ship experiences that move real business metrics.

WORK EXPERIENCE

Sparklit / Co-Founder, Product & Design / Hyperlocal marketplace
SEP 2025 - MAR 2026 • BENGALURU, INDIA

Co-founded and led product, design, strategy, and GTM for a hyperlocal home-services marketplace in India's $60B+ domestic-help sector, partnering with a co-founder who led technology and operations.

- Delivered a booking-to-payout experience built around a sub-15-minute arrival promise, achieving 95%+ fulfillment and 100+ daily orders within three months across a 2 km radius.
- Balanced supply against real-time demand through a micro-zone crew deployment strategy, sustaining service reliability with a 15-person crew.
- Grew the business to 60% repeat usage and 24% month-over-month revenue growth on a fully bootstrapped model.
- Validated demand part-time before committing full-time, then wound down operations after being unable to secure the funding required to scale further.

Amazon / UX Designer / Appstore Developer Experience
JUL 2024 - NOV 2025 • BENGALURU, INDIA

Led design for Amazon's Appstore Developer Experience platform, progressing from individual contributor to design lead managing a 2-person team, and partnering closely with engineering and product to serve a global developer community.

- Redesigned core developer workflows spanning two-way communication, submission, and testing journeys for a developer community of 10,000–100,000+.
- Closed a trust gap in developer onboarding by surfacing fraudulent clone-app submissions earlier in review, reducing exposure to user data theft.
- Reduced a stalled 7-day review cycle with a parallel testing workflow, unblocking every new developer submission.

Honeywell / Advanced UX Designer / OT cybersecurity & enterprise data platforms
SEP 2022 - JUN 2024 • BENGALURU, INDIA

Owned design for two concurrent enterprise platforms under Agile delivery: an AI-powered cybersecurity product and an internal leadership visibility platform by partnering directly with engineering and business stakeholders.

- Built an AI-powered anomaly dashboard for an OT cybersecurity product as the sole design owner, surfacing insights and resolution guidance directly.
- Built an internal leadership platform replacing manual PPT reporting with a live view of project, budget, and staffing data, reaching 76% adoption.

- Earned 3 Bravo Awards for the impact of the leadership visibility platform.

Nytro.ai / Product Designer / Sales-readiness platform
MAY 2021 - MAR 2022 • BENGALURU, INDIA

Owned the AI-powered pitch experience for Nytro.ai as it spun into an independent entity, covering pitch creation, recording, and post-pitch analytics.

- Drove 84% customer engagement and grew CSAT scores by 26% from a 34% baseline across a Fortune 100 / Global 1000 customer base.

Regalix / UX Designer / Sales-readiness platform
JUN 2019 - APR 2021 • BENGALURU, INDIA

Designed Sharedemos, a client content-onboarding platform, and led its evolution into Nytro.ai as the dedicated UX designer.

Lobotus Technologies (Pearson) / UI/UX Designer / School LMS platform
AUG 2018 - MAY 2019 • BENGALURU, INDIA

Designed MyPedia, an end-to-end school LMS platform, scaling adoption to 500+ schools across India by the time of exit.

Freelance / Independent Consultant / UX/UI design consulting
JUN 2017 - JUL 2018 • REMOTE

Delivered early-career UX/UI design for clients including Treebo, Celegence, GE Water, and Quest Global, bridging graduation to a first full-time role.

EDUCATION

Ramaiah Institute of Technology / Master of Computer Applications
KLES BCA / Bachelor of Computer Applications
